

Progress Update | Sprint 1 October 03, 2025 | G-Cache

Sprint 1 percentage completion: 100%
Project percentage completion: 5/44 → 11.36%

Table	Timeline					New
Aa TASKS	Status	Assignee	Start Date	Category		
Project Proposal Document	Done	Daniel Victorioso	September 11, 2025 → September 15, 2025	Documents		
User Story	Done	Hannah Lorainne M. Genandoy	September 21, 2025 → September 22, 2025	Documents		
Use Case	Done	Ivan Delumen	September 21, 2025 → September 26, 2025	Documents		
WBS	Done	Gerald Mamasalanang	September 21, 2025 → September 23, 2025	Documents		
▼ Sprint 1 - UI/UX Mockup	Done					
High Fidelity	Done	Hannah Lorainne M. Genandoy I Ivan Delumen R Reyes Simone	September 26, 2025 → October 3, 2025	Front End		
Style Guide	Done	I Ivan Delumen R Reyes Simone Jake Hannah Lorainne M. Genandoy	September 26, 2025 → October 3, 2025	Front End		
Wireframe	Done	Hannah Lorainne M. Genandoy	September 26, 2025 → October 3, 2025	Front End		
Web Host	Done	D Daniel Victorioso G Gerald Mamasalanang	September 24, 2025 → September 30, 2025	Back End		
API docs	Done	Gerald Mamasalanang	September 26, 2025 → September 27, 2025	Documents		

Sprint 1 focused on the **UI/UX Mockup, Style Guide, and API Documentation** stage, laying the foundation for the project's design, development, and user experience. The team successfully completed the wireframes, which provided low-fidelity layouts for the core user flows, and developed high-fidelity mockups for the key screens, including the **Landing Page, Dashboard, Activities, Notes, Reports, Settings, and Profile**. In addition, a comprehensive **style guide** was created to ensure design consistency, covering the color palette, typography, components, and states.

To support backend development, the **API Documentation** was also finalized in Sprint 1, covering all endpoints for **User Management, Activities, Sessions, Notes, and Reports**. This provides a clear blueprint for future implementation.

Lastly, the team configured the **initial web host setup using Amazon Web Services (AWS)**, preparing the environment for deployment readiness.

Sprint Retrospective:

What went well:

- All deliverables (wireframes, mockups, style guide) were completed on time.
- Clear task assignments made collaboration efficient.
- Team maintained strong alignment with project requirements.

What could be improved:

- Everything went well but minor adjustments are needed, particularly fixing inconsistencies and adding missing features to the mockups.

What needs to be done (Sprint 1):

- Apply revisions if suggestions or feedback are given on the mockups.
- Finalize AWS hosting configurations and test deployment setup.
